How Does the iPhone 17 Pro Compare to Previous Models?

One of the most common questions people have when a new iPhone is released is how it compares to previous models, particularly in terms of price. With the iPhone 17 Pro now on the market, it's essential to understand how it stacks up against older models like the iPhone 16 Pro and iPhone 15 Pro in terms of both features and pricing.

Price Comparison:

- The iPhone 16 Pro, which was released the previous year, was priced at AED 4,199 for the base model (128GB), which is lower than the iPhone 17 Pro by around AED 300.
- The iPhone 15 Pro had a starting price of AED 4,299 for the 128GB variant, making it a slightly cheaper option compared to the iPhone 17 Pro.

In terms of price, the iPhone 17 Pro is priced similarly to its predecessors, with the base model starting around AED 4,499. However, the additional storage options available for the iPhone 17 Pro give consumers more flexibility, and the upgraded specifications offer clear improvements over the iPhone 16 and iPhone 15 Pro models.

Feature Comparison:

- **Design:** While the iPhone 17 Pro shares a similar design language with its predecessors, it has a slightly slimmer body and thinner bezels, making it feel more modern and streamlined.
- **Performance:** The A17 chip in the iPhone 17 Pro provides a significant performance boost over the A16 chip found in the iPhone 16 Pro, resulting in better overall speed and efficiency.
- **Camera:** The camera system on the iPhone 17 Pro has received a major upgrade, especially in terms of low-light performance and image processing, compared to both the iPhone 16 Pro and the iPhone 15 Pro.

In short, while the iPhone 17 Pro does not drastically change the formula set by previous models, the incremental improvements in hardware, performance, and camera capabilities make it a more attractive option for those looking to upgrade their device.
