Official retail prices in Germany (2025)

According to the official data from Apple Germany and major retailers: the iPhone 17 Pro is available in several storage configurations — 256 GB, 512 GB and 1 TB. The starting price for the 256 GB model is 1 299 €.

Historically, for previous iPhone versions such prices already included German VAT — so the amount you see is what you pay outright in a store or via an authorized retailer.

Retailers list the following approximate prices as of late November 2025: 256 GB — 1 299 €, 512 GB — 1 549-1 550 €, 1 TB — around 1 799-1 800 €.

What affects the price: storage, VAT, and offers

As you may expect, storage size strongly impacts the price. The bigger the storage — the higher the cost. A 256 GB variant is the entry-level price, while 512 GB or 1 TB significantly increases the cost.

Because Germany (like the rest of the EU) applies value-added tax (VAT), the listed retail price already reflects that. That's why prices in Germany are higher compared to the base prices announced in USD by Apple (which exclude local taxes).

Another element that can shift the effective price is promotions or purchase options via carrier plans or installment plans. Some telecommunication providers or retailers offer deals — for example, with a contract, or in monthly installments — which might make the purchase more manageable.

When buying soon — what to expect

The launch of iPhone 17 Pro happened in September 2025, and the initial retail prices (as given above) reflect launch conditions.

But historically, prices of iPhones tend to adjust over time. Some market-watchers project that — depending on demand and supply — discounts or price drops could occur several months after release.

If you don't need the phone immediately, it might be worth watching price developments. On the other hand, if you prefer getting a new device under warranty and with full retail conditions, buying soon ensures full availability and less risk of stock shortage (especially for high-demand colors or storage variants).

Is the iPhone 17 Pro worth the price in 2025?

That depends on what you expect from your smartphone. The iPhone 17 Pro comes with the new generation hardware — improved chip performance, updated camera system and all the modern features users expect from a flagship.

If you value longevity, good resale value, software updates over many years and high performance (for photography, work, gaming or productivity), paying the official 1 299 €+ price can be justified. But if you are more budget-conscious or don't need "top-tier" performance, waiting for potential price drops or considering a slightly older model could be more economical.

Where to buy—official stores and retailers

You can purchase the iPhone 17 Pro directly from the official Apple Store in Germany, or from authorized retailers — large electronics chains and online sellers. Deals with mobile carriers and installment options are also available depending on the provider.

When buying from third-party retailers, always check that the device is "new" and not refurbished, and that it includes official warranty — this ensures you get proper consumer rights and software support in Germany/EU. High-quality retailers list clearly the storage variant, color and warranty conditions.

Conclusion: What you should know before buying iPhone 17 Pro in Germany

As of late 2025, the official entry-level price for iPhone 17 Pro with 256 GB storage is 1 299 €, with higher storage variants costing more. The price includes VAT and reflects retail conditions in Germany. If you want the newest model now and care about warranty, best performance and updates — purchasing soon makes sense. If you are price-sensitive and can wait, there may be small discounts or more favorable offers later.

Make sure to buy from authorized retailers or official stores to preserve warranty rights and avoid grey-market risks. And choose the storage variant according to your real needs: more space costs more, but might be useful if you store lots of photos, videos or apps.
