

## When Does iPhone 17 Come Out for Verizon? Everything You Need to Know

The iPhone 17 is one of the most anticipated releases from Apple, and if you're a Verizon customer, you're probably wondering when you can get your hands on the latest model. The iPhone 17 promises new features, improved performance, and cutting-edge technology. But what exactly do you need to know about the release timeline for Verizon users? In this article, we'll cover all the essential details about the iPhone 17 launch, including expected release dates, pre-order information, and what you can expect when it arrives on Verizon's network.

### What Is the Expected Release Date for iPhone 17?

Apple has a tradition of unveiling new iPhone models in September each year. The iPhone 17 is expected to follow the same pattern. While the exact date can vary slightly from year to year, Apple typically announces its new devices on the first or second Tuesday of September. After the announcement, pre-orders usually open the same week, and the official release date is typically set for the following Friday.

For the iPhone 17, you can expect the same timeframe. Based on Apple's usual release schedule, we anticipate an official announcement in early September 2025. If history is any indication, pre-orders could begin within a few days of the announcement, likely in the first week of September. The iPhone 17 will then likely become available for purchase in stores and online around the second Friday of the month.

### When Will iPhone 17 Be Available for Verizon Customers?

As with previous iPhone models, Verizon will offer the iPhone 17 shortly after its official release. Verizon has been one of Apple's main partners in the U.S., so you can expect them to have the latest model available for their customers, typically right alongside other major carriers like AT&T and T-Mobile.

The exact date when Verizon customers can start purchasing the iPhone 17 will depend on when pre-orders start and when units are shipped. If the pattern from previous years holds true, you should expect Verizon to offer the iPhone 17 for purchase by mid-September 2025, if not earlier. You'll be able to buy it directly through Verizon's website or at physical stores across the country.

### Will Verizon Offer the iPhone 17 in All Storage Options?

Apple typically releases the iPhone 17 in several storage configurations. While the exact options haven't been confirmed yet, previous models have offered versions with 128GB, 256GB, 512GB, and 1TB of storage. Verizon usually carries all the storage options for the latest iPhone models, so you can expect a wide variety of choices for the iPhone 17.

However, some specific configurations might be limited during the initial release. If you're aiming for a higher storage option like the 1TB model, it's always a good idea to pre-order early to ensure availability. Verizon's website and stores

will have all the details about which models are in stock and available for purchase.

## What Are the iPhone 17 Pricing and Plans on Verizon?

While Apple typically announces the iPhone's pricing at the same time as the device itself, Verizon will offer the iPhone 17 through its typical range of payment plans and financing options. Verizon customers can expect to have the option to purchase the iPhone 17 outright or pay for it in installments through Verizon's device payment program.

If you're on an eligible Verizon plan, you may also be able to get a discounted price on the iPhone 17 by trading in your old device. Verizon often offers trade-in promotions that can significantly reduce the upfront cost of a new phone. Additionally, Verizon frequently runs deals that include monthly discounts or even "buy one, get one free" promotions when switching to their network or upgrading to an unlimited plan.

While the exact price for the iPhone 17 has not been confirmed, we can expect it to be in the same range as previous iPhone models. For reference, the iPhone 15 started at \$799 for the base model. It's safe to assume that the iPhone 17 will start in a similar price range, though it may vary depending on the specific features and storage options.

## Will iPhone 17 Support 5G on Verizon?

Verizon is one of the leaders in 5G technology in the U.S., so you can be sure that the iPhone 17 will support 5G connectivity on Verizon's network. The iPhone 17 is likely to feature the latest 5G bands and improvements in both ultra-fast millimeter-wave 5G and broader coverage with sub-6 GHz 5G.

In fact, the iPhone 17 is expected to deliver even faster speeds and better performance when connected to Verizon's 5G network. If you live in an area where Verizon has rolled out its 5G Ultra Wideband service, you'll likely experience some of the fastest mobile data speeds available in the world. Verizon continues to expand its 5G coverage, so if you haven't yet upgraded to a 5G-compatible phone, the iPhone 17 will be a solid choice to future-proof your device for years to come.

## Can I Pre-Order iPhone 17 on Verizon?

Yes, Verizon will almost certainly offer pre-orders for the iPhone 17 as soon as Apple announces the device. Pre-ordering is a great way to ensure you get your hands on the iPhone 17 on release day, especially if you're hoping to buy a specific color or storage configuration that might sell out quickly.

Pre-ordering through Verizon will allow you to choose between several financing options, including paying outright for the device or spreading the cost over monthly payments. It's also common for Verizon to offer special incentives or discounts for customers who pre-order the iPhone 17, so keep an eye out for any deals or promotions as the release date approaches.

## Will iPhone 17 Be Compatible with My Existing Verizon Plan?

If you're already a Verizon customer, there's a good chance that your existing plan will be compatible with the iPhone 17. Verizon supports a wide variety of iPhones, including those on older plans. However, if you're on a legacy plan or an older data plan, you may want to consider upgrading to one of Verizon's current unlimited plans to get the most out of the iPhone 17's advanced features, especially its 5G capabilities.

Verizon's latest plans provide more than enough data and perks for iPhone users, including access to Verizon's 5G network, Disney+ and Apple One bundles, and more. You may also be eligible for discounts if you are adding a new line or switching to Verizon from another carrier. If you're unsure about whether your current plan will work with the iPhone 17, Verizon customer support can help clarify any questions you might have.

## Conclusion

The iPhone 17 is set to be one of the most exciting iPhone releases in recent years, and Verizon will be right there to offer the device to its customers. Expect the release to follow Apple's traditional September announcement and pre-order schedule, with Verizon making the iPhone 17 available shortly afterward. Whether you're looking for a great deal on a new device, access to Verizon's 5G network, or a new financing option, Verizon is sure to offer a variety of ways to get your hands on the iPhone 17 as soon as it drops. Keep an eye on Verizon's website and your local Verizon store for the latest updates as the release date approaches!
